Year end 2021 Update from Drill Ranch, Nigeria

Drill Ranch is Open! - managing for COVID-19:

We've re-opened to visitors, including overnight guests at Afi, **school groups** for **educational tours**, and walk-ins for **wildlife advocacy** for the general **public**. It's nice to have our Donation Box open, too! **Masks required** for all, unless vaccinated. Major donor **Rettet den Drill** shipped boxes of quality, German-made, washable masks; we sell extras to mask-less visitors.

In June we began mandatory **staff vaccination** in Calabar & Afi, **thanks** to **Cross River State Ministry of Health!** Former staff Marta Ofre of Buanchor, now a nurse helped

keeper Kufre introduces a dwarf crocodile

organize vaccination teams to come to Afi camp from the state health clinic in Bateriko. Mask-wearing, hand-washing, distancing and rigorous animal food cleaning continue. So far, so good!

Who we care for right now:

617 Drills *Mandrillus leucophaeus*6 Afi groups/1 Calabar

27 ChimpanzeesPan troglodytes
Afi Mountain

11 Sclater's guenons Cercopithecus sclateri Calabar

3 Mona monkeys *Cercopithecus mona*Calabar

1 Putty-nose monkey Cercopithecus nictitans Calabar

2 Forest genets *Genetta sp.*Calabar

2 Rose-ringed parakeets *Alexandrinus krameri*Calabar

2 Softshell turtles *Trionyx triunguis*Afi Mtn./Calabar

2 White-faced Scops owls
Otus leucotis
Calabar

1 Dwarf crocodile
Osteolaemus tetraspis
Calabar

7 Senegal parrots
Poicephalus senegalus
Calabar

Thanks to **NESREA** National Environmental Standards & Regulations Enforcement Agency, Cross River State, for their **assistance to recover the parrots & parakeets** from illegal trade in Calabar; the birds were kept in horrific conditions; the parrots in very poor shape. Hats off to **David Prince** of **University of Calabar** for owl rescues. Genets, owls and parakeets will be **ready for release** soon!

Progress in 2021: Animal Food Barn complete, re-born Land Rovers & more!

The Animal Food Barn drive-thru design eases unloading of over 1 ton of animal food daily; there are cooking drums for boiling beans, coco yams, etc., plus 2 food washing tubs and multiple storage/sorting racks. Drill Ranch buys farm produce and gathered forest fruits from over 5,000 vendors from our local communities every year; our vendors are about 70%women.

For the 1st time, we can dial & receive telephone calls at Afi with installation of a remote cell phone antenna

connected to desktop phones, thanks to long term volunteer Pieter van Heeren and his brothers! On demand communication is **crucial for emergencies**.

Thanks to funding from **Zoo Hannover** & Rettet den Drill, we **recycled** 4 of our idled, old **Land Rovers** into **2 "new" ones**: this hardtop and a pick-up, for moving goods and people at Afi.

A new **back-up power system**, including inverter & battery bank, was installed in **Calabar**, slashing generator use. Extra 150w solar panels were acquired to **upgrade our Afi solar power** system to 24v to serve needs of enclosures and the **new veterinary building under construction**. Progress!

We completed **major work on all 6 drill fence lines:** old corner posts were replaced with free-footed steel posts stayed to buried poured concrete anchors, giving better tensioning and break-away when a tree falls on the fence, saving in-line posts and wires. **New bridges** were installed along the Group 1 fence line, our largest drill enclosure, over 12 forested acres. The **chimpanzee section** now has pipe-borne **water supply** and dedicated **storage tank**, facilitating cleaning and drinking water supply.

New partnership for animal nutrition with Flour Mills of Nigeria:

FMN developed a custom primate chow for us, now in production at Eastern Premier Feeds Mills

in Calabar - we collect 250 kg weekly, free of charge. The drills & chimpanzees LOVE the feed! This is a fantastic development to supplement our animals' diets with protein and essential nutrients and minerals. Thank you, FMN, for this tremendous support for Nigerian wildlife and Drill Ranch! It makes a difference.

\(\psi\)

Farewell to Bette, the bravest little drill we've known. Rescued from Mfamosing village by our friend Aniekan & Forestry officers, surviving his mother being shot and killed, attempted circumcision, he succumbed in October to a huge abdominal tumor of unknown origin. Viciously abused by humans, in constant pain, Bette was cheerful & stoic to the end, ready with a smile to welcome you. **RIP.**

Donations are fully tax deductible! You can mail a **check** to Pandrillus Foundation, P.O. Box 10082, Portland, OR 97296, or **online** at https://www.pandrillus.org/contact/donate/ *We thank you!!*
